

Illustrator

**I'm trying to import an AI file made up of several profiles.
Copy and pasting doesn't work. If I save as an eps and
import, the file's blank.**

Copying and pasting is not the best way to get your objects from Illustrator to Design 3D. Instead you should save as an Illustrator file (.ai) with the PDF compatibility option selected.

Then you will be able to import into Design 3D. Make sure you have installed the optional PDF Importer.

For more information, see Chapter 4 of the User Guide, which is available in the software's Help menu.
