

Modeling

Modeling tentacles - How would I go about modeling 3D tentacles made out of multiple pieces of metal?

There are always different ways to go about modeling a particular object. Take a look at this helpful thread on the StrataCafe:

http://www.stratacafe.com/forum/topic.asp?TOPIC_ID=8444&SearchTerms=tentacles

If you are not familiar with Strata's poly editing and SDS (subdivision surface modeling), you may want to take a look at the Art & Science of Design 3D that you may have received with your Strata 3D CX 6 or 7 purchase. That will help you through learn to use the modeling tools.

The Art & Science of Design 3D is also available through Strata's online store:

<https://store.strata.com/SearchResults.asp?Cat=3>
