How can I quickly get some human figures into a scene?

We don't sell any human figures in the Strata store, however there are some other options.

-There are a few (free) human shapes available on the StrataCafe.com:

-Some of our designers use figures from Poser (software).

-Some designers simply use 2D humans, faced towards the camera, to add to their architectural or exhibit renderings. Here's one example:

-If you post this question to the StrataCafe.com Design 3D forum, you could likely get some more specific help:

-Here is a thread on the Cafe about human figures:
