# Does Enfold export to 3D pdf files like Esko Graphics Studio?

Strata Enfold 3D CX does not directly export to a 3D PDF, but is a way to accomplish this with Strata software:

- You can open the Enfold file in Strata Design 3D CX and then export to an XMM file, using Render > Render to Live 3D. Then open the .xmm file in Strata Live 3D CX 2 or Strata Live 3D PDF, and create a 3D PDF from there.
- You can create PDF and web presentations using the Live 3D plug-ins which ship with Live 3D and are installed into Photoshop CS4 or CS5 Extended.
