

## General

### Can I use an ARD (.ard) file in Enfold?

The .ard format is the native file format for Esko's ArtiosCAD application, and .box is the Enfold 3D native file format.

You can import an .ard file into Enfold by simply renaming the file with the .box extension. For example, File.ard would become File.box. Then import the .box file using the "Place a box file" option in the 3D View palette in Illustrator.
