

General

Is Enfold compatible with Mavericks (Mac OS 10.9.x)?

Yes, Strata Enfold 3D CX will run on the Mavericks operating system. Even though we are no longer selling Enfold, we still work with Esko to maintain the licensing database for those customers who have already purchased Enfold.

-You will need to use an updated version of the Esko Local License Manager. You can download the new license manager [here](#).

-You will also need to use the License Manager to activate or deactivate Enfold - in Mac OS 10.9, you cannot manage your license from within Illustrator.

Unique solution ID: #1464
