

Photoshop

PS Plug-ins - In PS CS5, when I try to transfer a model the 64-bit version of Photoshop opens.

Try opening PS CS5 (32-bit) and with a new document open, go to Filter menu > Strata Design 3D CX > Model New.

In Design 3D, put an object such as a sphere into the resulting document, and then choose Send Model to Photoshop. This should help set the correct Photoshop version to be used with the Strata PS plug-ins.
