

ScriptFX/Lua

Modifying ScriptFX - I'm using the "Back" easing function Smooth Motion ScriptFX, but the motion doesn't overshoot the final position as much as I'd like.

There is a thread on the StrataCafe on this subject:

http://www.stratacafe.com/forum/topic.asp?TOPIC_ID=8456

Also see the Lua Scripting Forum on the StrataCafe:

http://www.stratacafe.com/forum/forum.asp?FORUM_ID=23

And, of course, see the Scripting Documentation which you can access through the Help menu in Design 3D CX.
