

# Installation and Registration

## I downloaded the Enfold trial, but I don't know how to install and activate it.

### Installing Strata Enfold 3D CX on Windows

To install software for Windows, Double click on Strata Enfold 3D CX.exe.  
Select your language.

Click the appropriate link and follow the instructions on the screen. Make sure Illustrator is not running during the installation of the plug-in(s).

### Installing Strata Enfold 3D CX on Mac

The disk image contains an installation package for Mac: To install it, double click the package and follow the instructions on screen. Make sure that Illustrator is not running during the installation.

### Trials and Licenses

This software is protected against unauthorized use. You can try the software for free for 30 days. If you want to use the software after that, you need to purchase and activate a license. To purchase a license, please visit <http://store.strata.com>.

The EskoArtwork Plug-ins window is where you can start the free 30 day trial or activate a purchased license. If this window does not pop up automatically when starting Illustrator, please select Help > Strata Enfold 3D CX > Trial and Licenses from the Illustrator menu.

There is also a more advanced tool to manage your licenses and trials: the EskoArtwork Local License Manager. This application is installed in your Applications folder (Mac) or see Start > Programs > Esko > Local License Manager (Windows).

### Online Help

For online help on the Strata Enfold 3D CX plug-in, select Help > Strata Enfold 3D CX > User Guide from the Illustrator menu.
