

# Vector

## **Vector for v6 - I just purchased Design 3D CX 6. I already own Strata 3D Vector for v5.x but it's not showing in the Render menu.**

You can go to the Free Update and Patches

page:[http://www.strata.com/support/free\\_updates/](http://www.strata.com/support/free_updates/) and get the Vector updater.

When you install the Vector update, you will need to have your original Vector CD or disk image mounted. This allows the updater to verify that you have already purchased the product.

When you restart Design 3D, you should see the Render Vector... option in the Rendering menu.
