

## Advanced Editing

# Blackboard File - I'm trying learn the Meson language and I am unable to run the "blackboard" as described in the manual.

The Blackboard system is no longer shipped as part of Live 3D. However, you can get access to it directly from Kaon (Kaon is our technology partner for Live 3D).

Go to:

<http://portals.v-central.com>

Log in using:

user: demo

pass: demo

Download the installer for the platform you're working on (Windows or Mac). You'll find the Blackboard in the installed folder.

Unique solution ID: #1236
