

Distributing Artwork

Corners - How can I distribute artwork around a corner?

You cannot use the Distribute Selection command in the Enfold 3D View panel to distribute artwork across panels that are not coplanar. However, there is a way to distribute art around corners in your packaging design.

This process is described in detail in an FAQ in the Enfold documentation. To access this FAQ, go to the Help menu in Illustrator, and choose Strata Enfold 3D CX > User Guide.

In the menu on the left side, find the FAQ section and choose "How can I distribute around a corner?"
